## IMC Launches Interactive Web Programs

[www.imcestimator.com](http://www.imcestimator.com)

IMC Construction has introduced an internet-based interactive estimating and bidding web program— [www.imcestimator.com](http://www.imcestimator.com). This one of a kind program demonstrates IMC's innovative competitive advantage in the construction industry. While expediting and streamlining the bidding process, IMC Estimator brings subcontractor and vendor management to new levels. It allows registered users to view and bid every project IMC is working on, 24 hours a day, 7 days a week.

IMC Estimator is an interactive resource. Users can email questions, download documents, and automatically receive notices and updates. This provides users with the opportunity to acquire information and place bids quickly and conveniently.

[www.imcconstruction.com](http://www.imcconstruction.com)

IMC Construction has created a cutting-edge new website— [www.imcconstruction.com](http://www.imcconstruction.com). Not only does the website host IMC's latest project photos, it also provides information about company values, history, and qualifications.

IMC is proud to be voted Best Place to Work in the Philadelphia Region

*South Brunswick, NJ*

## Comcast Project Under Way

The IMC team continues to raise the bar in construction diversity with a state of the art Design / Build Data Center project located on 23 acres in East Goshen Township, Pennsylvania. The National Comcast Data Center includes: sitework construction, complete shell, core, and partial fitout. This three-building construction project includes over 60,000 linear feet of underground PVC, and contains over 260,000 linear feet of computer cable. The expected completion is Summer 2006.
